How Animals Sleep?

Brand-new Pingshang Campus

Brand-new Appearance

In the beginning of a new semester, many students will notice new installation on campus. During summer vacation, many corners of Pingshang Campus were refurbished. Let's take a look at the changes.

Among all transformation, the new dormitory must be the one that students look forward to the most. In order to motivate freshmen to choose NPTU, the head of our school determined to improve the living environment. It took two years to build the Second Dormitory. Beside the comfortable living environment, students benefit a lot from the facilities in the dormitory.

FamilyMart

A new FamilyMart opens on the first floor in the Information Building. It provides several seats outside the store. In this way, students can eat here, and this saves a lot of time to eat off campus. Besides, sometimes the products which are about to overdue will have a 30% discount. If you are budget-limited, why not go there and see if you are lucky enough to get the cheaper price.

Study Room

Some students need a comfortable studying place. Study rooms in the dormitory bring a lot of convenience. On one hand, students do not need to go too far. For another, there is no time limit. As long as the door is unlocked, students are permitted to study here at any time.

Discussion Room

In addition to individual academic performance, teamwork is also important at college. Discussion room is an ideal choice for having meetings and discussing reports. Remember to register in advance if you need it and pay attention that it close at 10 p.m.

A Flying of Pingtung

When the students walk along the Campus Ecological Ponds, they will find the installation called “a Flying of Pingtung”, which carries the accumulation of knowledge and growth. In addition, its appearance in the shape of a hand likes the flyleaf which means the stories are not finished and the text of the land will continue.

Another installation is in front of the Library and Information Center Building, the installation likes a wind drive generator which is also a fountain. The fountain will spray water automatically after a period of time. The two new installation become a new landmark and attractions for many students in the campus. Next time, if you want to take a break, the two new places are the best choices for you.

In the lane, there is a burst of fragrance. Located on Minquan Rd., which is famous for its donburi, is the Japanese food restaurant— The owner of the restaurant was a young man, with his like-minded friends, they want to have a restaurant which can become popular in Pingtung.

food restaurant

the Japanese

Japanese food is their popular dishes, especially donburi. In public opinion, donburi is a kind of Japanese food with the exquisite exterior and rich in ingredients, however, donburi is not the good choice for the very hungry people. Although full in content, however, donburi is usually not in the large size, instead of the big amount, most of the chiefs will focus on the quality not the quantity. In order to break this traditional thinking, **平井郎** always prepare the fresh ingredients of the day.

From meat to seafood, the owner wakes up early in the morning, and go to the market to pick up the fresh meat and seafood. The owner said, he wanted to have the store, which can sell the Japanese food that can become popular, moreover, to his insistence, he wants to change the common idea that Japanese food especially donburi is not just for the guest who want to eat well not eat full. In the picture, as you can see, many meats cover the rice. With the Sukiyaki sauce and onion, make the rich taste.

Now, more and more students come here looking for the donburi in the legend. Fine cooking materials and the fresh, plentiful ingredient indeed let **平井郎** become more and more popular. Next time when you pass by Minquan Rd., stop pause and look around, you will see a group of young who make effort to make their dream come true.

🕒 17 : 00 ~ 24 : 00

📍 No. 81, Minquan Rd., Pingtung City, Pingtung County 900

On Children-Molly's

Last day

Sometimes, it is parents' love that hurts children deeply, but parents might not be aware of this. The Taiwan TV drama, "On Children-Molly's last day", tells that Molly is an obedient kid, and she tries every effort to meet her mother's expectation. However, even though she goes to Taipei First Girls High School, this is not good enough for her mother. Finally, she can't bear anymore after a long period of time, she chooses to commit suicide to end up her suffering.

In the beginning of the TV drama, Molly's story was shown in flashback. Through her committing suicide, her mother was eager to explore the cause of this tragedy. I cried my heart out right after a couple of minutes of my watching this drama. Because I had a similar story with Molly's, I was extremely aware of what she felt and thought about. Some parents are worried about their children getting hurt, so they will make decision for their children, including their study, love, and friends and so on. Moreover, parents always say "This is the best for you." They may really care about their children, but if love means controlling and commanding, it will for sure cause the tragedy like the ending of this TV drama. As a result, communication between parents and children is above everything.

The TV drama "On Children-Molly's last day" is different from ordinary Taiwan TV series about romantic love. It focuses on the problem of parent-child relationship nowadays. This is why I strongly recommend the TV drama for you. Through this TV drama, both parents and children can meditate and learn how to get along with each other without pain and suffering.

How

Animals Sleep?

All the creatures in the world need to sleep. However, do you know that lying down is not the only way to sleep? In fact, different animals have various sleeping poses.

Some creatures lie down while sleeping like human do. For example, deers and dogs. When lying down, the body area of thrust surface is the biggest, so the body receives the least pressure. In this sleeping gesture, the body consumes the least energy. According to doctor Ding-Xiang, when lying down, the organs in the body are the most relaxed, and it also avoids snoring.

Most of the herbivorous animals stand up when they sleep. For example, elephants, giraffes and cows. The reason why those kinds of animals stand up when sleeping is that they need to avoid the attack by predators. Standing gesture helps them to gain more escape times while predators appear.

Some marine life set in the ocean when they sleep. For instance, whales and seals. In order to avoid hitting into other species, whales place in the ocean while they sleep. Seals set in the ocean when they sleep so as to breath in the air more conveniently.

To conclude, there are a lot of sleeping poses in the world, which are closely related to their environment. Through sleeping poses, we can not only know about the habit of animals but also realize the mystery of nature.
